gitリポジトリの作成

GitHubのリポジトリ作成画面

The screenshot shows the GitHub 'Create a new repository' page. The browser address bar shows 'https://github.com/new'. The page title is 'Create a new repository'. Below the title, it says 'A repository contains all the files for your project, including the revision history.' The 'Owner' dropdown is set to 'taroyamada-internous'. The 'Repository name' text input field contains 'test' and has a green checkmark icon to its right. Below this, there is a note: 'Great repository names are short and memorable. Need inspiration? How about [bug-free-succotash](#).' The 'Description (optional)' text area is empty. At the bottom, there are two radio buttons for visibility: 'Public' (selected) and 'Private'. The 'Public' option has a subtext: 'Anyone can see this repository. You choose who can commit.' The 'Private' option has a subtext: 'You choose who can see and commit to this repository.'

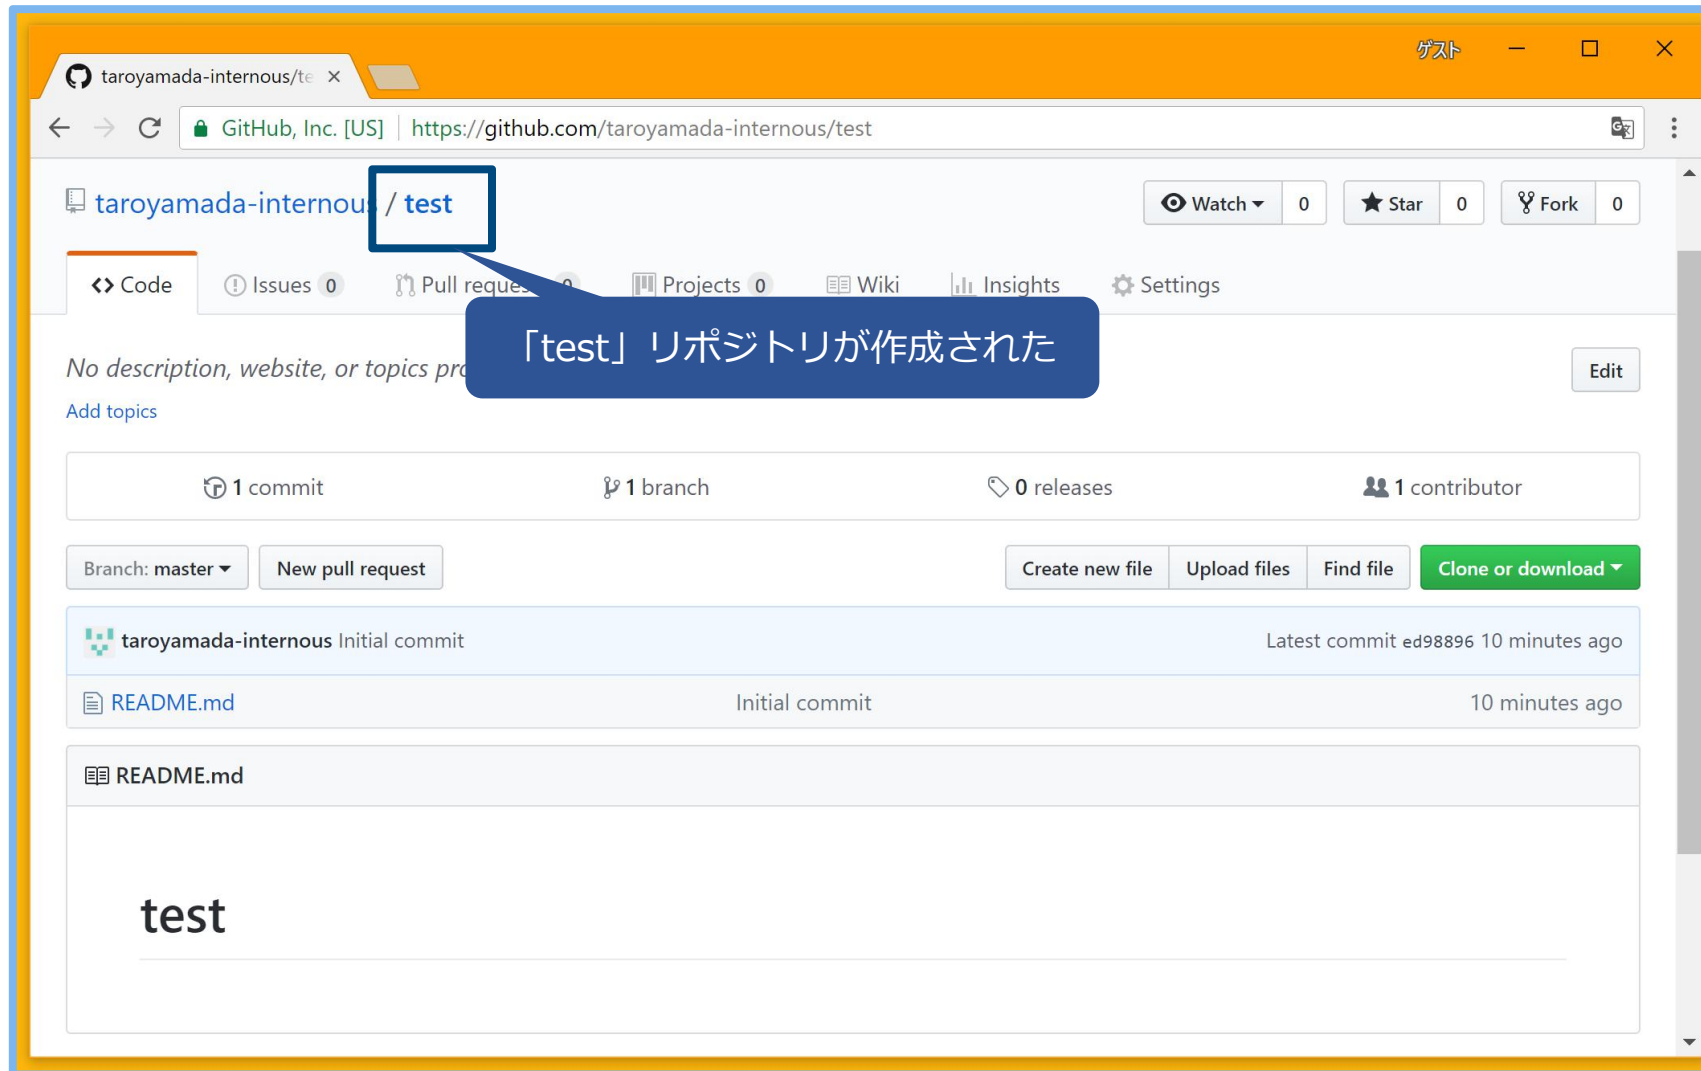

① 「test」と入力する
